(The Monroe Institute Bulletin, Fall 1987)

HUMAN PLUS

The long-awaited HUMAN PLUS (H- PLUS) program. which uses HemiSync to provide practical mental tools for a more effective, joyful physical life, is getting underway. Beginning with six-day Intensives at TMI Center in Virginia ('87 Intensives are already full but see "1988 Schedule" for upcoming H-PLUS opportunities), the H-PLUS program will soon include Weekends and an ever-expanding in-home learning system that requires no preliminary training or experience. Also, the TMI Gateway Outreach (GO) program is earmarked to become an outlet for H-PLUS.

We at TMI are excited about Bob Monroe's new vision for providing tools that will assist Humankind in reaching its full potential. Implementing a new program of the scope and nature of H-PLUS requires a great deal of work (script development, script writing, voicing and producing tapes, program design and development, planning means of distribution, logistics etc.) from many individuals. It will continue to take the time and effort on the part of many dedicated people to bring HPLUS to its fruition. All the mechanisms for getting H-PLUS out to our Membership and the public at large are not yet in place. Watch future issues of TMI "Bulletin" for updates and details on H-PLUS.
